EDUCATION

Degree	Specialization	Institute	Year	CPI
B.Tech	Computer Science & Engineering	JNTUK	pursuing	7.8
HSC BIEAP	Physics, Chemistry, & Mathematics	VR junior College	2022	482
BSEAP	-	SKKMH school	2020	512

PROFESSIONAL SUMMARY

- Motivated Computer Science graduate with strong foundations in Python, Machine Learning and Deep Learning, and Problem Solving.
- Hands-on experience building **data-driven machine learning projects** and applying analytical techniques to solve real-world problems.

INTERNSHIP

- **Data Science Intern – Plasmid** [Certificate](#) Jan-Aug 2024
 - Gained hands-on experience in data preprocessing, visualization, and exploratory data analysis (EDA).
 - Worked with Python libraries such as **Pandas, NumPy, and Matplotlib** for handling and analyzing datasets.
 - Enhanced problem-solving and teamwork skills by collaborating with mentors on real-world tasks.

CERTIFICATIONS and TRAINING

- **Data Science Training – Quality thought IT Training Institution** [Certificate](#) Jul 2025 – Feb 2026
 - Gaining hands-on experience through **real-time data science projects**.
 - Enhancing **problem-solving and analytical thinking** with industry-oriented practices.

PROJECTS

- **Credit Card Fraud Detection | Machine Learning Project** [Github](#)
 - Built a **credit card fraud detection model** using **Machine Learning in Python**, handling highly imbalanced financial data through **data preprocessing and sampling techniques**.
 - Evaluated models using **Scikit-learn** and optimized performance using **Precision, Recall, F1-Score, and ROC-AUC**.
 - Achieved approximately **89% model accuracy** for reliable fraud detection.
- **Session-Based RAG System | Generative AI Project** [Github](#)
 - Developed a **session-aware RAG application** using **Python, Django, LangChain, and OpenAI** context-aware responses.
 - Implemented semantic document retrieval with **vector embeddings and session memory** to leverage previous conversation context.
- **Email Spam Detection System | Machine Learning NLP Project** [Github](#)
 - Developed an NLP-based **student performance prediction model** using **email spam classifier using text preprocessing, CountVectorizer, and Naive Bayes** algorithms.
 - Applied feature engineering and achieved **98% accuracy** in classifying spam and legitimate emails.

EXTRA-CURRICULAR ACHIEVEMENTS/ACTIVITIES

- Secured **first position in Gully Cricket** game out of **5+ teams** as a part of college 2025
- Secured a **position in the Inter Cricket Squad 2025** out of **5+ competing players** from the institute

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Frameworks:** Django
- **Machine Learning:** Linear Regression, Logistic Regression, Decision Trees, Random Forest, SVM, KNN
- **Generative AI LLMs:** LangChain, Retrieval-Augmented Generation (RAG)
- **Tools & Platforms:** Jupyter Notebook, VS Code, PyCharm, Google Colab, Antigravity
